

### Modular Avenger™

#### Purpose

- ▶ Designed for mounting on ANSI/ISA 76.00.02 1.5" base compliant sampling system substrate to provide sample conditioning and analyzer protection by coalescing and removal of liquid droplets and solid particles from gas (vapor) streams requiring low flow rates.\*
  - ▶ If the sample contains liquid aerosol mist, see the product selection guide/product sheet for the Modular Genie® Membrane Separator™ Model MG

#### Notes

- ▶ Head and bowl design for easy access to filter element.
- ▶ A variety of stainless steel and borosilicate glass fiber filter elements available.

\* See the Modular Avenger™ product sheet for additional information.

#### Model MA

- ▶ Pressure rating is 3,750 PSI (MOP)
- ▶ Internal volume is 20 cc
- ▶ Two port (Inlet & Outlet) and three port (Inlet, Outlet, & Bypass) models available
